

ELSEVIER

Volume 80, December 2014

CONTENTS

Section I: Computational Statistics

- M. Černý and M. Hladík*
The complexity of computation and approximation of the t -ratio over one-dimensional interval data 26
- E.C. Chi and K. Lange*
Stable estimation of a covariance matrix guided by nuclear norm penalties 117
- Y. Auffray, P. Barbillon and J.-M. Marin*
Bounding rare event probabilities in computer experiments 153
- G. Kobayashi*
A transdimensional approximate Bayesian computation using the pseudo-marginal approach for model choice 167
- F. Xiang and P. Neal*
Efficient MCMC for temporal epidemics via parameter reduction 240

Section II: Statistical Methodology for Data Analysis

- F. Vilca, N. Balakrishnan and C.B. Zeller*
The bivariate Sinh-Elliptical distribution with applications to Birnbaum–Saunders distribution and associated regression and measurement error models 1
- J. Horrocks and M. Rueffer*
A Bayesian approach to estimating animal density from binary acoustic transects 17
- J. Kang and S. Lee*
Minimum density power divergence estimator for Poisson autoregressive models 44
- T.T. Nguyen and F. Mentré*
Evaluation of the Fisher information matrix in nonlinear mixed effect models using adaptive Gaussian quadrature 57
- J. Xu and Y.-G. Wang*
Intra-cluster correlation structure in longitudinal data analysis: Selection criteria and misspecification tests 70
- S. Wei, L. Xu and R.J. Kryscio*
Markov transition model to dementia with death as a competing event 78
- K.-J. Lui, W.G. Cumberland and K.-C. Chang*
Notes on testing equality in binary data under a three period crossover design 89

<i>F.D.-H. Lau and A. Gandy</i> RMCMC: A system for updating Bayesian models	99
<i>K. Lee and J.K. Yoo</i> Bayesian Cholesky factor models in random effects covariance matrix for generalized linear mixed models	111
<i>A. Hapfelmeier and K. Ulm</i> Variable selection by Random Forests using data with missing values	129
<i>X. Wang and X. Shi</i> Robust estimation for survival partially linear single-index models	140
<i>M.W. Donoghoe and I.C. Marschner</i> Stable computational methods for additive binomial models with application to adjusted risk differences	184
<i>H. Lian, P. Du, Y. Li and H. Liang</i> Partially linear structure identification in generalized additive models with NP-dimensionality	197
<i>F. Rohart, M. San Cristobal and B. Laurent</i> Selection of fixed effects in high dimensional linear mixed models using a multicycle ECM algorithm	209
<i>K. Zhao and H. Lian</i> Variational inferences for partially linear additive models with variable selection	223
