

CHEMISTRY

1. Synthesis and radical Polymerization of N-4-anisylmaleimide and its copolymerization with methyl methacrylate 01 to 09
S. L. Oswal and A. M. Patel
2. Synthesis of formazan derivatives as antimicrobial agents 10 to 15
A. D. Desai, K. H. Chikhaliya and K. R. Desai
3. Interaction of Nonionic Polymers with sodium dodecyl sulphate in Aqueous solutions. 16 to 21
G. M. Malik
4. Synthesis of 4,4-Methylene bis 2-fluoroaniline Bisazo Reactive Dyes and Their Dyeing Performance On silk, wool and Cotton. 22 to 29
Naitik B. Patel, Rutesh R. Shah, K. C. Patel and S. K. Patel
5. Synthesis, Characterization and application of hot brand reactive dyes based 4,4'- Methylene-bis-m-niroaniline on various fibres. 30 to 37
Bhavesh M. Patel and Saurabh K. Patel

COMPUTER SCIENCE

6. A Comparative study on Various Crossover methods used in Genetic Algorithms. 38 to 42
Pushpal Y. Desai and Apurva A. Desai
7. Pattern Predictor : A Decision support system for forecasting pattern occurrence in the commodity Market-A data mining approach. 43 to 49
R. D. Morena and Apurva A. Desai

LIFE SCIENCES

8. Somatic embryogenesis in *Gloriosa superba* L. : A threatened medicinal Plant. 50 to 54
Vipul Somani and R. J. Thengauze
9. Value Addition : A strategy for marketing of medicinal plants 55 to 64
Minoo Parabha and Farzin Parabha
10. Assessment of the water quality of Purna river, Valsad (Gujarat) with special reference to the Heavy Metal pollution 65 to 68
Manoj E. and G. Ragothaman
11. Biological Evaluation of Tapi Estuary 69 to 72
Kapila Manoj
12. Effect of different carbon and nitrogen sources on lipase production by *Staphylococcus* species. 73 to 76
G. S. Shah and P. V. Desai

MATHEMATICS

13. Quartic spline Collocation solution of Falkner - Skan problem with mass transfer. 77 to 89
D. C. Joshi and H. D. Doctor
14. Numerical solution of heat transfer problem through spline collocation 90 to 94
Harish D. Doctor
15. Meksyn Method for MHD Falkner-Skan Equation. 95 to 102
M. G. Timol and Mital D. Desai
16. On the class of similarity solutions for three dimensional boundary layer flows of non-Newtonian fluids. 103 to 109
M. G. Timol and Manish Patel
17. Relaxation flow model for pressure transient derivative data analysis of Viscoelastic fluid with phase redistribution in fractured reservoir 110 to 116
Asha S. Mishra, P. H. Bhathawala and Dilip C. Shah

PHYSICS

18. Studies on Microhardness behavior of non crystalline, crystalline and wire plates type Bismuth sample. 117 to 122
Dipali J. Vaidya and K. C. Poria
19. Studies on some simple physical parameters of naturally grown kidney stones. 123 to 125
Umesh Parekh and K. C. Poria
20. An improved digital phase locked loop. 126 to 132
V. G. Joshi

STATISTICS

21. A brief review of estimation from incomplete samples in finite population with special reference to randomized response techniques. 133 to 139
P. C. Gupta
22. Choosing a dispersion statistics for assessment of dispersion about known mean of normal population 140 to 148
V. D. Naik and J. J. Desai
23. On proper efficiency and second order duality for multiobjective programming problems. 149 to 156
R. D. Patel and Mehul Shukla
24. On the estimation of the coefficient of Variation for finite Population III. 157 to 162
Arti Rajyaguru and P. C. Gupta
